

Here is the Title of Your Paper

Your name.*

Abstract

Here comes your abstract.

This is a template for documents prepared with L^AT_EX for the journal Economics-The Open Access, Open Assessment E-Journal (www.economics-ejournal.org).

You find further instructions in the Introduction. Please read them.

Keywords: Insert the keywords here, separated by commas.

Journal of Economic Literature Classification: Insert the classification numbers, such as J7, B54, etc. here.

*Give your affiliation and thanks here.

Introduction

Here the text of your introduction.

Some further notes:

This template is developed for L^AT_EX. For proper output you need to put the the graphic `EconEpsilon.jpg` either in the folder containing your active document, or where L^AT_EX can find it. You may also point directly to it by adjusting the second line in the preamble. Currently it is `\newcommand\typopath{EconEpsilon}`. If the file `EconEpsilon.jpg` is located in `C:\Documents\New`, the line has to be changed into `\newcommand\typopath{C:/Documents/New/EconEpsilon}`, for instance. (Note that you have to replace backslashes by slashes in the path.)

Make sure that you compile with `pdflatex`. (View and print as PDF, don't use `DVI==>PDF`). If it works, save this file under another name in the same directory. Then play around with it. If it does not work, check you L^AT_EX installation.

1 Here the Title of Your First Section

Here your first Section, but I insert here some further instructions instead.

For the bibliography, use the Economics E-Journal style sheet `EconEJ.bst`, available at www.economics-ejournal.org. This note contains an example for a bibliographic reference using these files. The reference to the example bibliography `EconEJ.bib` is at the bottom of this file.

Regarding figures and tables, use floats with preferred float placement on top of page. For figures and sub-figures you see two examples below: Figure 1 illustrates a simple figure, and Figure 2 illustrates a figure with two sub-figures.
