

# Template for L<sup>A</sup>T<sub>E</sub>X

Ekkehart Schlicht

January 25, 2010

## 1 Purpose

The files provided in this package are intended to be used for articles that are prepared for Economics: The Open Access, Open Assessment E-Journal. The template is intended for use with Latex.

## 2 Contents

This package includes the following files:

Readme.Latex.pdf	this file
EconEJ.tex	the template file, to be compiled with pdf <sub>l</sub> atex
EconEJ-printout.pdf	the printout of the above file
EconEJ.bst	BibT <sub>E</sub> X style sheet.
EconEpsilon.jpg	a graphics file, needed for the template
EconEJ.bib	example bibliography
percentiles.pdf	example picture in subfolder Images
productivitycurve.pdf	example picture in subfolder Images
productivitycurve2.pdf	example picture in subfolder Images

### 3 Instructions

Extract all files to an empty folder and compile `EconEJ.tex` with `pdflatex`. If you use a  $\text{\LaTeX}$  editor like *T<sub>E</sub>XnicCenter* or *Winedt*, make sure to compile directly to PDF, don't use DVI ==> PDF. Read the additional remarks on figure and table formatting. Save the template under another name and play around, or fill in the text of your paper.

It may be the case that some  $\text{\LaTeX}$  packages needed for Economics E-Journal articles are missing. *MiK<sub>T</sub>E<sub>X</sub>* will install these on the fly (if the option is enabled) or will complain. If you don't want to install these packages in your system, just download them from the Ctan archive ([www.ctan.org](http://www.ctan.org)) and place them directly in the folder where your document is located.

**Enjoy!**
