

Template for Scientific Workplace 5.5

version 1.0

Ekkehart Schlicht*

December 8, 2009

1 Purpose

The files provided in this package are intended to be used for articles that are prepared for Economics: The Open Access, Open Assessment E-Journal. The template is intended for use with the software *Scientific Word/Scientific Workplace* and is **not**, I repeat **not**, usable with standard L^AT_EX distributions. For these, another package is available at www.economics-ejournal.org.

2 Contents

This package includes the following files:

Readme.SWP.pdf	this file
EconEJ.SWP.tex	the template file, to be opened with SWP
EconEJ.bst	BibT _E X style sheet.
EconEpsilon.jpg	a graphics file, needed for the template.

*schlicht@lmu.de

3 Instructions

Copy `EconEpsilon.jpg` into the directory `C:\swp55\Graphics\`. If it does not exist, create it. If you can't create it, don't worry: You will find further instructions in the template itself.

Follow the instructions for Scientific workplace regarding BibT_EX and copy `EconEJ.bst` into the directory where SWP can find it (usually `C:\swp55\TCITEX\bibtex\bst`).

Open `EconEJ.SWP.tex` with SWP and, to ensure that everything works, compile it in PDF mode. (Print as PDF or view as PDF). Read the additional remarks on figure and table formatting. Save the template under the name of your paper and fill in the text of your paper.

Enjoy!
